DEALER: Barber RV	RETAIL NAME:
CITY: Ventura	P.O. #:

## General Options

### Interior

TechnoForm, Euro-Style cabinet doors w/nickel finish hardware  
7" touchscreen dash radio w/Carplay & Android Auto  
Solid surface countertop in kitchen  
Rapid Camp +™ Multiplex lighting and systems control  
24" TV in living area

### Exterior

Thule bike rack, roof rack, power patio awning, and roof ladder  
Winegard Connect 2.0, 4G/WiFi/Digital TV antenna  
Solar charge controller w/190W solar panel  
2.8Kw Onan gas generator  
Truma Combi Eco Hydronic furnace & water heating system  
Dual, Group 31, AGM house batteries  
11K BTU low-profile air conditioner

### Options

☒ \$24,994 Power Pack Electrical System

# Re(Li)able™ Battery System

Powered by **MASTERVOLT**

Thor Motor Coach® has collaborated with Mastervolt® to create a battery system that redefines on-board power technology. Mastervolt is a global leader in marine and RV power conversion and is the perfect partner to provide clean, efficient, grid-quality power without the need for a generator or AC source.

## Why Lithium Ion?

### Less Weight

Mastervolt lithium-ion (Li-Ion) batteries are approximately 1/4 of the weight of a traditional battery and have a much smaller footprint. The lighter weight also means your vehicle carries less.

### Longer Lifespan

Traditional batteries last about 500 cycles. Li-Ion batteries last approximately 3,500 cycles. You would have to buy up to 7 conventional batteries to match the lifespan of a single Li-Ion battery.

### Safety

Mastervolt Li-Ion batteries utilize Lithium Iron Phosphate (LiFePO<sub>4</sub>), which is the safest and most stable of all of the lithium-ion chemistries. In addition, our exclusive Active Cell Balancing regulates energy from the most charged cell to other cells to reduce heat and promote safe, even charging.

### Improved Power Delivery

Certain electrical functions in your RV require large amounts of power in a short time. For example, slideouts, large stereos, and refrigerators demand significant amps to function correctly. Li-Ion batteries can discharge large amounts of power immediately to meet the demands of the sophisticated electrical systems in your RV. Li-Ion batteries also can accept large amounts of energy quickly that translates into fast charge times to keep you on the road safely and comfortably.

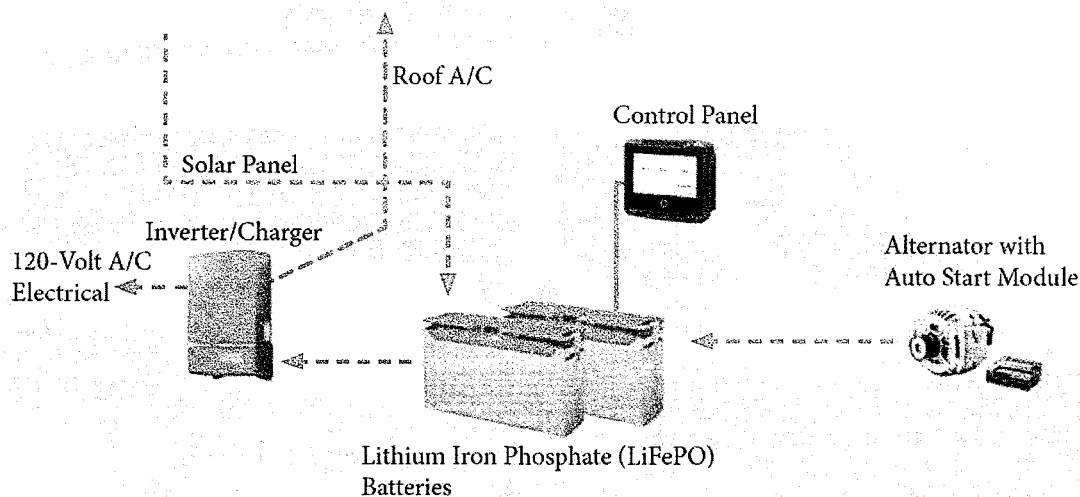

### Better Performance

Traditional batteries start to show decreases in performance after only 50% discharge. As a conventional battery discharges, you will see your lights dimming, stereo sound diminishing, and low voltage on all electronics that are running off of the battery. Li-Ion technology has consistent, uninterrupted performance up to 95% discharge. When you need better performance of your electrical system over a longer time.

# Re(Li)able™ Battery System

ONLY AVAILABLE ON:

# SEQUENCE™

&

# TELLARO™

IMPORTANT-PLEASE READ: This brochure reflects product design, fabrication, material, components and specifications at the date of printing, which date is disclosed below. Please visit us online at [ThorMotorCoach.com](http://ThorMotorCoach.com) or consult with your selling dealership for the latest in standards, options, specification and technical information. Photographs in this brochure may depict optional equipment or may only be available in certain floor plans. Components, appliances and the chassis may have been manufactured in a calendar year before the vehicle's designated model year. All capacities are approximate. The actual length of the vehicle may differ from that indicated in the brochure due to variances in the manufacturing processes and/or installed components. All dry weights are based on standard model features and do not include optional features or equipment. Component part and appliance manufacturers issue limited warranties covering portions of the vehicle not covered under the limited warranty we issue. Copyright Thor Motor Coach, Inc. © OH 10/17/2019
