

Vegatouch Eclipse Module

Mobile Device Integration

Eclipse uses wireless technology to connect to mobile devices allowing control of:

- HVAC
- Lighting
- Awnings
- Slides
- Generator
- AGS
- Water Pump
- Tanks

Features:

- **Easy Installation:** Mount and plug in network cable, download app, and connect
- Control your coach locally offline and remotely anywhere there's internet!
- Supports all mobile devices including iOS/Android smartphones and tablets

What is Eclipse?

Eclipse will allow you to control all of the systems in your coach using your preferred mobile device.

Eclipse connects to your current multiplex system and serves as the bridge to your phone and/or tablet using local and remote wireless technology.
